From PSMR 2015: 4th Conference on PET/MR and SPECT/MR La Biodola, Isola d'Elba, Italy. 17-21 May 2015

¹A*STAR-NUS Clinical Imaging Research Centre, Singapore The aim of this study is to assess the performance of 18F-FDG whole body PET/MRI in comparison with PET/CT based on SUV. Anatomical location of lesion with Dixon MRI and additional value of advanced MRI technology such as diffusion weighted MR imaging in diagnosis of malignant disease will also be investigated.
